1. Receipt is acknowledged of amendment filed 21 April 2005, which papers have been placed of record in the file.

2. Claims 1-29 are allowed over the prior art of record. The following is a statement of reasons for the indication of allowable subject matter:

Claims 1 and 16 are allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose an apparatus and method comprising responding to insertion of a cartridge having an information storage medium for moving said head adjacent to the medium, determining compensation information relating to the spacing between said read and write portions, said receiving unit subsequently effecting writing of information with said head as a function of said compensation information, as presented in the environment of claims 1 and 16. It is noted that the closest prior art, Gomez et al., shows a similar method for head offset measurements. However, Gomez et al. fails to disclose being responsive to insertion of a cartridge having an information storage medium for moving said head adjacent to the medium while using said head to write selected information to the medium and then performing the compensation as claimed.
